## 1. Situation Assessment Worksheet

## Assess Your System's Visibility and Visual Image

Ask yourself:	
What does your system look like to the public?      Are its name and logo recognizable?     Can you easily find information that tells you how to ride?     Is that information easy to understand?     Are bus stops clearly identified?     Are bus shelters clean and the trash emptied?     Is passenger information posted at the bus stops or shelters?      Can you find a customer-service telephone number easily —	
<ul> <li>□ At the shelters?</li> <li>□ At the bus stops?</li> <li>□ On a website?</li> <li>□ In the phonebook (yellow and white pages)?</li> <li>□ If you call that number, are you able to reach a person?</li> </ul>	
Assess Your System's Passenger Experience  Ask your riders:  Ride the bus and visit with other riders  Do they find the service meets their needs? Is passenger information readily available? Are service changes communicated clearly? Are bus stops clearly marked? Is service on time? Are the fare structure and payment options easy to	Marketing might get someone on the bus for the first time, but only a good passenger experience will keep that person coming back.
<ul> <li>Are the fare structure and payment options easy to understand?</li> <li>How is the ride? <ul> <li>Is interaction with the bus operator pleasant?</li> <li>Is the ride comfortable?</li> <li>Is transferring difficult?</li> </ul> </li> <li>What changes would improve the service?</li> </ul>	

- Recruit first-time-riders to try the system and give you feedback
- Ask riders to complete an onboard survey

Ask system employees — bus operators and customer service representatives — how they think passengers perceive the system.

## **Assess Your Image in the Community**

Ask non-rider groups — community leaders, employers, stakeholders and gatekeepers (individuals or organizations that can provide access to potential user groups) — their views of the system:

<ul> <li>What kind of service does the system offer?</li> </ul>
<ul> <li>☐ Fixed Route</li> <li>☐ Demand Response</li> <li>☐ Deviated fixed route</li> <li>☐ Paratransit</li> </ul>
Who is the service for?
☐ General Public ☐ Specific groups
What groups use the service?
<ul> <li>□ Workers traveling to their jobs</li> <li>□ Middle, high school, college students</li> <li>□ Clients of social service organizations</li> <li>□ Seniors</li> <li>□ Persons with disabilities</li> <li>□ Low-income riders</li> </ul>
How does your service benefit the community; does it enhance quality of life?
<ul> <li>☐ Increased mobility for transit-dependent individuals</li> <li>☐ Economical transportation</li> <li>☐ Environmental benefits</li> <li>☐ Do employers depend on your service for their employees?</li> <li>☐ Is your service a viable option for visitors?</li> <li>☐ Are there other groups that could benefit from using your service?</li> </ul>
Ask system employees — bus drivers, customer service personnel — their views of the system
Who are the system's principal riders?
What groups represent potential riders?
What value does the service bring to the community?
